

EIGHT SEMESTER PLAN FOR GRADUATION

Please note that extra space has been allotted to include any summer, winter or additional coursework. When planning your schedule, remember:

1. Certain courses must be taken in sequence (especially in Math and the Sciences.)
2. If you repeat a course you will only get credit for it once and the grade you get for the final attempt is the grade that will count.
3. Courses cross-listed in two or more departments are considered the same course and the repeat rule takes effect if you take the course more than once.
