UNDERGRADUATE RESEARCH FELLOWSHIP IN ECOLOGY & EVOLUTIONARY BIOLOGY

- $5000 to support undergraduate summer research in EEB including salary, travel, or other research expenses
- Priority consideration for students from underrepresented groups, or who have overcome obstacles and disadvantages, or have experience with diverse environments
- Students should develop a research plan with the support of a faculty member from EEB
- Students need not be EEB majors but must demonstrate interest and creativity through their proposed research plan
- Applications due by Friday March 26

Questions: Dr. Cory Merow (cory.merow@uconn.edu)
UNDERGRADUATE RESEARCH FELLOWSHIP IN ECOLOGY & EVOLUTIONARY BIOLOGY

How to Apply

- Applications due by Friday March 26. Email to Dr. Merow
- Applicants should contact a faculty member to develop a plan together
- Proposals encouraged from students considering EEB graduate programs. All undergraduates are welcome to apply
- Interviews during last week of March 29. Decisions by April 2.

Applications consist of:

1. Student letter (2-3 pages) addressing (a) EEB interests and career goals, (b) plan for summer research (e.g. hypotheses, data collection, analysis), (c) description of research relationship to global change (d) budget describing how funds will be used.

2. Support Letter from an EEB faculty mentor including (a) recommendation, (b) mentoring plan, (c) project deliverables (e.g., conference presentation, contribution to a manuscript, etc.). Faculty should email letter to Dr. Merow.
